

## **Tuba**

Tuba is a range of brass pull handles designed by product designer Felix de Pass and architects Freehaus.

The classic, timeless design is made from raw, uncoated brass that will develop an attractive natural patina through use. Whilst this product embraces the aging qualities of the material, it can also be brought back to its original state through polishing.

Composed of vertical tubes and solid brass end castings, the product is hard-wearing and built to last; suitable for both internal and external contract environments. The handles are available in a range of sizes and configurations, including different lengths and matching push plates.

## Material

Polished Brass

\*Other finishes available on request

## Care Instructions

The brass is hand polished and not lacquered or treated in any way. This is to embrace the natural ageing characteristics that will develop through use, and allow shine to be brought back with appropriate cloths and polishes.

## Note

FF.TUBA.650.PB.BT : 650mm bolt through pull handle.  
FF.TUBA.650.PB.FF : 650mm face fixed pull handle.

FF.TUBA.500.PB.BT : 500mm bolt through pull handle.
